ANTICORROSIVE PRIMER

Anticorrosive primer paint which improves adhesion. Compatible with all paint systems (alkyd, acrylic, nitro-combination) water and solvent based. Designed for priming surfaces made of metal, wood, aluminium, stone, concrete, plastic surfaces, except of some plastics and styrofoam. Wide range of application hobby and professional works. at home, garden, automotive and industry. Best result when applied at 15-25°C. Capacity 400 ml

Primer Red	Primer Grey
Primer White	Primer Black

CHROME EFFECT

High quality acrylic lacquer with shiny metal chrome effect, achieved because of metallic dust "leafing extra". Recommended for smooth surfaces made of metal, wood, aluminium, glass, ceramics, stone, concrete and some plastics. Especially practical for works of art and decoration. At florists can be used for fresh and artificial flowers. Best result when applied at 15-25°C. Capacity 150 / 400 ml

Chrome Effect Gold	Chrome Effect Silver
Chrome Effect Copper	

HIGH TEMPERATURE

Heat resistant lacquers which retain their colours even at 650°C. Product made of high quality silicone resins. Application: automotive: mufflers, motors, industry: chimneys, furnaces, home: fireplaces, stoves, radiators, boilers. Notice. Do not use primers previously. Do not cover any coating on the top. Best result when applied at 15-25°C. Capacity 400 ml

High Temperature Red	High Temperature Clear
High Temperature Aluminium	High Temperature White
High Temperature Anthracite	High Temperature Black

FLUORESCENT

Acrylic paint with a high content of fluorescent pigments which make them more intensive and have light reflecting properties. Recommended to painting inscriptions and warning signs. Marking dangerous places to emphasize their visibility. Used successfully at surveying works and forestry, as well as in decorating, at florists can be used for fresh and artificial flowers. Notice. Fluorescent paint is not a phosphorescent one (glow in dark). Covering depends on usage of white primer. Covered with clearcoat improves weather conditions resistance. Best result when applied at 15-25°C. Capacity 400 ml

Fluorescent Yellow	Fluorescent Pink
Fluorescent Orange	Fluorescent Green
Fluorescent Red	Fluorescent Blue

ACRYL METALLIC

Acrylic lacquer of unique metallic effect. Used by tuning fans for cars, motorbikes, bicycles, models of cars and airplanes, metal stands, caps, tool cases. For surfaces such as metal, stone, wood, and some plastics. Notice. For surfaces made of PUR, PS, PA, EPDM, ABS, GfK, Hart – PCV use Plastic Primer DECO COLOR previously. Best result when applied at 15-25°C. For additional protection you should use Acryl Car Line Clear DECO COLOR. Apply before painted surface become dry. Capacity 400 ml

Metallic Gold	Metallic Green
Metallic Red	Metallic Silver
Metallic Violet	Metallic Black
Metallic Blue
